

*Purposeful Delivery to Achieve Mission-Critical Outcomes*

**ABOUT**

**WHO WE SERVE**

Compass Government Solutions (CGS) has over 30 years of collective executive experience providing full-service Health and Wellness services, Research and Program Management and pilot program execution to federal government agencies nationwide and OCONUS to accomplish their mission-critical objectives. Our services support the Military Service Member, Veterans and other federal personnel in their goals of maintaining wellness, healing, returning to the workforce, to their families and to their communities through integrated healthcare and research. Our efforts are bettering short and long-term outcomes.

**Traumatic  
Brain Injury  
(TBI)**

TBI is a predominant injury in both peacetime and wartime for Service Members and veterans. The number of TBI patients has increased due to the current theaters of combat as well as exposure to ongoing training-based hazards. CGS' personnel work as contract staff supporting the TBICoE network located throughout the Military Health System (MHS) and Veteran Affairs Health Systems (VA) facilities across the US. TBICoE's mission is to conduct congressionally mandated traumatic brain injury (TBI) clinical research investigations, surveillance, clinical tool development, and dissemination of TBI education to DoD medical personnel, service members, including Guard and Reserve, and veterans with TBI, as well as their families. CGS supports this research with professionals working across the country.

**Types of Research Specialists**

Research Scientists- PhD or MD	Education Coordinators
Surveillance Analysts- PhD in Epidemiology or Biostatistics Dissemination	Materials and Product Designers
Clinical Research Coordinators	Research Epidemiologists
Statistical Data Analysts	Neuroimaging Researchers

Compass Government Solutions has deep knowledge, a strong database and the recruiting capability to hire healthcare professionals to support medically oriented government facilities and research centers nationwide and OCONUS. CGS executives have participated in several IDIQs supporting the Army, Navy and Air Force healthcare requirements. Our frontline, passionate, dedicated people provide patient care, doing important clinical research, supporting the health and mental wellbeing of those who serve and have served while delivering to our customer mission critical services to meet their objectives. We strive to maintain the highest quality standards and excellence in our daily practice.

**Health  
Care**

**Types of Clinical and Non-Clinical Specialists**

Physicians	Nursing
Advance Practice-NPs/PAs	Allied Health
Social and Behavioral Health Specialists	Administrative

**eMSMs &  
IRMAC**

The referral management and patient appointing centers located throughout the United States is the first point of contact for military beneficiaries looking to schedule health care services through the Military Health System. Our executive team has been closely tied to these centers for over 10 years as participants of government contracts with personnel at these centers at various locations throughout established regional service areas. With the evolution of governance models for the Military Treatment Facilities' (MTFs) that are operated by two or more DoD services (i.e., Army and Navy), the Enhanced Multi-Service Markets (eMSMs) provides the overlapping catchment areas with the intent to enhance medical readiness, community health, and individual health care while reducing costs.

At the crossroads of technology, science and people, Compass Government Solutions brings capability to support our customer's mission. CGS's value add for our federal customer is creating solutions that makes an impact for optimization and better outcomes for their programs and requirements.

**Other Efforts  
Supported**

Suicide Prevention Programs	Resiliency Programs
Human Performance Optimization	Humanitarian Efforts
Medical Case Management	Social Work Programs
